FLEXKIT

BY JES SUPPLY COMPANY

“City of North Las Vegas, Public Works has been using this product for the last 5 years. The City projects involved were to repair cracks and chips in the concrete at two Fire Stations, vertical concrete repair on the restroom at the Craig Ranch Regional Park, reattaching the steel guard on a bridge, repair of the spalled sidewalk & valley gutter in front of the pallet yard that has heavy & large vehicle use. The original Pilot Program done six years ago to replace a wing section of a commercial driveway is still in tact.”

- John Runiks
Manager of Infrastructure Maintenance

BEFORE

AFTER

FLEXKIT superior fast-set concrete repair material allows traffic in under an hour and is three-times stronger than concrete with superb adhesion. The most versatile, durable and unique product of its kind, **FLEXKIT** is the long-term concrete repair performance solution for deep holes, feather-edge and overlay applications. With unmatched strength and endurance, **FLEXKIT** withstands extreme abuse without breaking apart or popping out.

**TRAFFIC IN
15 MINUTES**

Returning traffic to repaired areas in 15 minutes virtually eliminates downtime.

**EASY
APPLICATION**

Our products are easy to use. Everything you need is in the kit.

**COST EFFECTIVE
& PROFITABLE**

Saving time saves money. By virtually eliminating downtime, labor costs are lower and profits higher.

**UNMATCHED
DURABILITY**

FLEXKIT is 3-times stronger than concrete and lasts for decades - no maintenance required.

**-30° TO 220°
FAHRENHEIT**

From freezers to freeways, **FLEXKIT** has virtually no temperature restrictions.
